

GrowPet Platform

Smart Care for Happy Pets & All Species Wellness

Statement of Work (SOW)

Version: 1.0.0 (Production)

Date: September 6, 2026

Project ID: edunova-b432b

1. Executive Summary

GrowPet is an advanced, multi-species digital care management platform engineered for pet owners across all animal classifications: *Mammals, Birds, Aquatic Fish, Reptiles, Amphibians, and Exotic Pets*. The system provides automated habit care generators, AI-powered triage and symptom analysis, emergency GPS veterinary locator, multi-store price aggregation, and instant real-time multi-browser cloud synchronization.

2. Functional Scope & Delivered Modules

Universal Pet Profiles

Unlimited pet profile creation with intelligent species auto-detection, avatar gallery (cats, dogs, birds, reptiles, fish), and direct device photo upload via Base64.

Tailored Care & Streak Engine

Automated daily care checklists tailored to species biology. Live calculation of Happiness Score (0–100%), care streaks, and celebratory confetti animations.

AI Veterinary Care Consultant

Species-aware AI chat assistant providing immediate dietary analysis, symptom triage, emergency first-aid protocols, and persistent chat cloud memory.

GPS Vet Locator & Emergency Routing

High-accuracy dual GPS and IP Geolocation fallback with 1-click popular city shortcut filters, phone dialing, and direct Google Maps turn-by-turn routing.

Medication & Health Records Vault

Track medication schedules, dosage instructions, last-given timestamps, weight tracking history (grams and kg), and veterinary medical visits.

Multi-Store Price Comparison

Aggregated price comparison across major pet retailers (Amazon, Chewy, Petco, PetSmart, Walmart) with expense categorization and budget analytics.

1-Click Passwordless Auth & Real-Time Cloud Sync

Frictionless passwordless email authentication with deterministic user UID generation. Full cross-browser and cross-device synchronization powered by Firebase Cloud Firestore live snapshot listeners.

3. Technology Architecture & Stack

Layer	Technology / Library	Purpose
Frontend Framework	React 18 + TypeScript	Type-safe, component-driven reactive user interface
Build & Tooling	Vite 8 + Tailwind CSS	Ultra-fast production build and responsive styling
Cloud Database	Firebase Cloud Firestore	NoSQL real-time document sync with subcollections
Authentication	Firebase Auth + Custom Session	1-Click passwordless login & Google SSO integration
Hosting & CDN	Firebase Hosting	High-availability global Edge CDN with SSL encryption
Geolocation	W3C GPS API + ipwho.is	Dual GPS & fallback IP location detection

4. Deliverables & Milestone Completion Status

Milestone	Deliverable Scope	Status
M1	Multi-species UI/UX, species care presets, responsive dark/light mode	Delivered
M2	GPS Vet Locator with Google Maps routing and city shortcut pills	Delivered
M3	Multi-store price aggregator (Amazon, Chewy, Petco, PetSmart, Walmart)	Delivered
M4	Passwordless 1-Click Email Login and authentication flow	Delivered
M5	Real-time multi-browser Cloud Firestore live data synchronization	Delivered
M6	Smart photo auto-matcher, avatar preset gallery, device file upload	Delivered
M7	Production deployment on Firebase Hosting (edunova-b432b.web.app)	Delivered

5. Production Deployment Sign-Off

Production Endpoint: <https://edunova-b432b.web.app>
Hosting Status: Active & Globally Distributed

✓ ALL MILESTONES
VERIFIED

Supported Platforms: Android (Chrome/PWA), iOS (Safari), Desktop (Chrome, Edge, Safari, Firefox)
